

STANDARD  GROUP

STANDARD GALVA STEELS PVT LTD

COMPANY PROFILE

STANDARD GALVA STEELS PVT. LTD.

M/s. STANDARD GALVA STEELS PVT. LTD. is a leading manufacturer of Metallic Flexible Conduits and Conduit Accessories. These conduits are manufactured in size range from 1/2" to 6". The conduits are made to very high standards and in various constructions as well as PVC coated in order to give an unequalled combination of strength, versatility and quality. Continuous investments in people and technology have enabled the company to expand rapidly and become the market leader. These conduits are widely used in various industry such as Electrical industry as protective covering for cables, Automobiles and Chemical industry as Low Pressure Exhaust of Dust, Fumes and Gases, Engineering Industry as outer casing of Flexible Shafts, Expansion Joints etc.

PRODUCTS

SLL/SLM/SLH: A simple square lock construction steel conduit made by helical winding of steel strips. These conduits are offered in different strip thicknesses and materials depending upon the end use and customer requirements.

SLAL/SLBR: Square Lock construction, highly flexible conduit available in Aluminum and Brass in various finishes such as matt, mirror and Bright pre-anodized aluminum which is imported from ALANOD, Germany.

SLPS: Square Lock construction steel conduits coated with heavy duty PVC with a smooth surface enabling the fitting to seal completely when assembled by method of extrusion which can withstand temperature upto 300' F.

SLPV: Square Lock construction steel conduits coated with heavy duty PVC with a uniform thickness of plasticised PVC under vacuum.

IL: Steel Strip is helically wound in interlock construction in which asbestos yarn or copper wire is inserted between the locking profile in order to impart liquid light properties.

QUALITY

Detailed attention is paid to manufacturing and quality. All products undergo continuous quality control thus ensuring high standards and reliability.

EXPORTS

During the recent years the company has developed an extensive network of overseas distributors and agents. We regularly exports these conduits to Far East, Middle East and African Countries. The Product is very well accepted and has created a niche for itself in these markets.

The Company has received the XVth International Award for Technology and Quality, Paris 1994, and EEC Certificate of Excellence (SSI) for 1993-94, 1994-95, 1995-96, 1996-97. In recognition of continuous Export Excellence, the Company has received EEPC Highest Exporters Trophy (SSI) for 1997-98.
